

2400-2500MHz 12dBi High Gain Panel Antenna

● Panel Antenna

Applications

- 2.4G WLAN system
- Point to point system
- Point to multipoint system
- Long distance communication
- Terminal antenna

Features

- High gain,
- Low VSWR
- Strong corrosion resistance ability
- Supplied with Down-tilt Brackets

Technical parameter

Model	Panel Antenna
Frequency Range- MHz	2400-2500
Bandwidth -MHz	100
Gain -dBi	12
Vertical Beamwidth °	35°
Horizontal Beamwidth °	35°
VSWR	≤1.5
F/B Ratio -dB	≥25
Polarization	Vertical
Max Power- W	100
Nominal Impedance-Ω	50
Connector	N female
Antenna dimensions -mm	220×190×50
Weight- kg	1.2
The Work Temperature-°C	-30°~60°
Rated Wind Velocity- m/s	60
Mounting Mast Diameter -mm	Φ30~50

Installation Instruction
